

Don't get caught out
in the cold

Never risk running out of heating oil again

Fit the innovative **Rix Tank Signal System** and you'll never have to worry about running out of heating oil again. We'll monitor your tank levels automatically while you get on with the important business of staying warm and snug.

Simple installation and no wires

The Rix Tank Signal System is easy to install. The level sensor fits most standard tank sizes and sends a radio signal to a small box plugged into your phone socket. This automatically relays your oil level information to the Rix monitoring station without interfering with your phone, fax or internet connection in any way. Easy!

Peace of mind

Rix will contact you when your oil level reaches a pre-agreed level or if you wish, can simply arrange to top up your tank whenever necessary. You don't have to do a thing except relax in the knowledge that you'll never lose your heating or hot water at just the wrong moment again.

Great value too

You can't put a value on peace of mind but the Rix Tank Signal System will provide it for the cost of a Sunday newspaper.
